

Let Carpenter And Honeywell Help You Take A Load Off

Meet the EPA Integral Skin Mandate With Solstice LBA

If you think there are no alternatives to HFCs for integral skin foam, think again. Integral Skin Polyurethane Foam Systems from Carpenter use Honeywell Solstice® Liquid Blowing Agent to eliminate HFCs. You'll get foam with the comfort level and density you want with a tough skin and fewer defects while meeting EPA mandates to eliminate HFCs.

Honeywell | Blowing Agents

 **CARPENTER**
We bring comfort to your life.®

NO HFCs. AND NO LIMITS.

Carpenter's integral skin formulations with Solstice® LBA have the physical properties and robust shelf life you want for your design and production needs.

"The products can be used in a variety of settings producing a wide variety of configurations," notes Jamie Spears, Flexible Foam Chemist at Carpenter. "They perform similarly to existing HFC foams while providing an excellent skin."

Designed To Meet Your Needs

NO HFCs!

Outstanding surface quality

Wide range of Shore A hardness levels

Comparable processing and densities to existing HFC-based formulations

Variety of configurations

Meet EPA Mandates

ELIMINATED
22 **CO₂**
MILLION METRIC TONS OF CO₂
